Profile

Software Development student skilled in Spring Boot, React.js, SQL, and modern web architecture. Experienced through internships and academic projects in Business Intelligence, SEO/AEO/GEO optimization, AI-assisted web generation, and microservices architecture. Strong foundation in Agile/UML with independent learning in Python/Flask, automation, Docker, and AI agents.

Work Experience

OneClick Maroc Marrakech, Morocco
Technical Internship - Web Development, SEO/AEO and AI 15 mars –15 mai 2026

- Created and optimized professional web pages for OneClick Maroc, improving SEO, AEO, responsive structure, and international visibility through French/English content.
- Worked on oneclick.ma and casablanca.oneclick.ma, targeting local and international search intent for agency services in Marrakech and Casablanca.
- Contributed to SrcAI, an AI-powered SaaS concept for generating complete landing pages with real-time preview and exportable HTML/CSS/JS.

Menara Prefa Marrakech, Morocco
Business Intelligence Intern

- Developed interactive dashboards using Power BI, transforming operational data into clear visual reports for management decision-making.
- Executed data extraction and querying tasks in SQL Server, improving data preparation quality and reporting reliability.
- Analyzed KPIs to identify trends related to production efficiency and resource utilization.

Projects

SrcAI - AI Landing Page Generator Internship Project
Full Stack Developer 15 mars –15 mai 2026

- Designed an AI-assisted platform that generates SEO/AEO-optimized landing pages with HTML, CSS, JavaScript, and image content.
- Built the architecture around Spring Boot, React, MySQL, JWT security, and Server-Sent Events for live streaming and real-time iframe preview.
- Integrated AI generation strategies using Gemini, DeepSeek, and local Ollama models to reduce cloud costs and support private localhost generation.

Optimization of Web Applications with Microservices Architecture PFE / Academic Research Project
Software Architecture Research 15 mars –15 mai 2026

- Researched how microservices improve performance, scalability, maintainability, and deployment speed compared with monolithic web applications.
- Studied architectural patterns including API Gateway, Service Discovery, Circuit Breaker, CQRS, Saga, event-driven messaging, and BFF.
- Proposed an e-commerce migration case study using Spring Boot, Spring Cloud Gateway, Kafka, Redis, PostgreSQL, Elasticsearch, Docker, Kubernetes, CI/CD, and observability tools.

LearnHub Platform Remote
Frontend Developer mars 2025

- Built a responsive Single Page Application for online education using React.js and Bootstrap 5.
- Structured reusable components and React Router v6 navigation for fast client-side browsing.
- Designed dynamic course rendering and interactive UI elements to improve the student browsing experience.

Menara Prefa AI Assistant Remote
Full Stack Developer juin 2024

- Developed an AI-powered customer support chatbot using Google Gemini AI, Spring Boot, and React with TypeScript.

- Implemented backend API management and context-aware support for a construction materials catalog.
- Created responsive component-based UI for mobile and desktop users.

Education

Higher School of Technology (EST) Laayoune, Morocco
DUT in Software Design and Development 2024–2026

- Coursework focused on full-stack software engineering, Spring Boot, React.js, SQL Server, UML, Agile methods, and UI/UX principles.

Independent Learning & Self-Development
Full-Stack, Automation and AI

- Independently developed backend skills with Flask and database design using MySQL and MongoDB.
- Expanded automation and AI workflow skills through n8n, AI agents, prompt-based tooling, and API orchestration.
- Practiced Docker containerization to package, run, and deploy web applications in reproducible environments.

Lycée Ibnou Almouataz Marrakech, Morocco
Baccalaureate in Experimental Sciences, Physical Sciences Option 2023–2024

Technical Skills

Languages	JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3
Frameworks	React.js, Spring Boot, Flask, Bootstrap 5
Databases	Microsoft SQL Server, MySQL, MongoDB, PostgreSQL, Elasticsearch
AI & Automation	Google Gemini API, DeepSeek API, Ollama, n8n, AI agents
Architecture	Microservices, REST APIs, SSE, JWT, API Gateway, Docker, Kubernetes basics
Tools & Methods	Hibernate, Agile/Scrum, UML, Power BI, Git, GitHub, VS Code
